200 C Street, S. W.
Washington, DC 20204

Dear Sir:

Since Americans now drink more bottled water, we need to know where the water is coming from. Please make it a law that all bottled-water labels disclose where the water comes from.

As a member of the Center for Science in the Public Interest, I support the FDA's proposal that bottled-water manufacturers be required to make available detailed reports of contaminants, just as public water utilities do.

Sincerely,

Robert L Carr
